

Hello! We're Learntuitive, and we're thrilled to bring you our latest updates! Here's what's new:

### **New Submodule: DNA Analysis Techniques**

We've just published the next submodule: DNA Analysis Techniques! It covers techniques ranging from sequencing to qPCR. The lecture slides are also formatted slightly differently; each concept will be accompanied by a link to a video reference that explains the concept more intuitively. Let us know what you think of this change!

### **Join Our Discord Community!**

The biggest news this month: we've launched the official Learntuitive Discord server!  It's the perfect place to:

- **Connect** with fellow biology enthusiasts
- **Discuss** study strategies and **dive** deeper into topics
- **Participate** in **Quizzes**®, **Competitions**® and **Game Nights**®

This is your chance to find new friends in our growing Learntuitive community. Simply click the link to join now:

<https://discord.gg/S3JNkt3wQ9>

### **Stay Updated with Resource Releases**

Moving forward, you'll find notifications about new resource releases on our website's announcement banner and in the release notes section. Plus, we'll keep you informed via email if you sign up for our mailing list.

### **Resources Available for Download**

To make it easier for you to access our materials, all Lecture Slides, Question Sets and Additional Resources are now **available for download** on the Resources page of our website

(<https://learntuitive.com/resources>). Head on over to grab the materials that you need!

### **Updated Timeline**

Our release timeline has been updated to reflect the latest additions and upcoming modules. Check it out at [learntuitive.com/timeline](https://learntuitive.com/timeline) to see what's up next!

Thank you for being part of our mission to make learning biology intuitive and accessible, and wishing you all a Happy New Year!
